

MOLLY

 **FORMA IDEALE**

Dečija soba / Children's room Moly

Dečija soba Moly projektovana je da u potpunosti odgovori zahtevima za organizacijom radnog i prostora za odmor i igru mališana, dok će funkcionalni ležaj zadovoljiti potrebe za kvalitetnim snom. Kombinovanjem elemenata prema dimenzijama i potrebama mališana, postiže se maksimalni estetski i funkcionalni balans.

Children's room Moly is designed in such a way to meet the needs of kids to have their work and entertainment space well organized and to have a functional bed that provides them with dreams of high quality. Aesthetically functional balance can be achieved when combinations are made on the basis of right dimensions and kids' needs.

- 6) Set sto / Table set SMART RITMO

Prijatnom i inspirativnom osećaju najmladih doprineće ružičasti i plavi tonovi frontova elemenata koji podstiču toplinu, osećaj pripadnosti i prostranstva. Kombinacija svih osam elemenata je praktično neograničena i uklapa se u svet mašte mališana i njihovim potrebama tokom odrastanja. Dodatna funkcionalnost elemenata sa kliznim vratima, pruža mogućnost kombinovanja više elemenata u manjim, a estetski zahtevnijim prostorima.

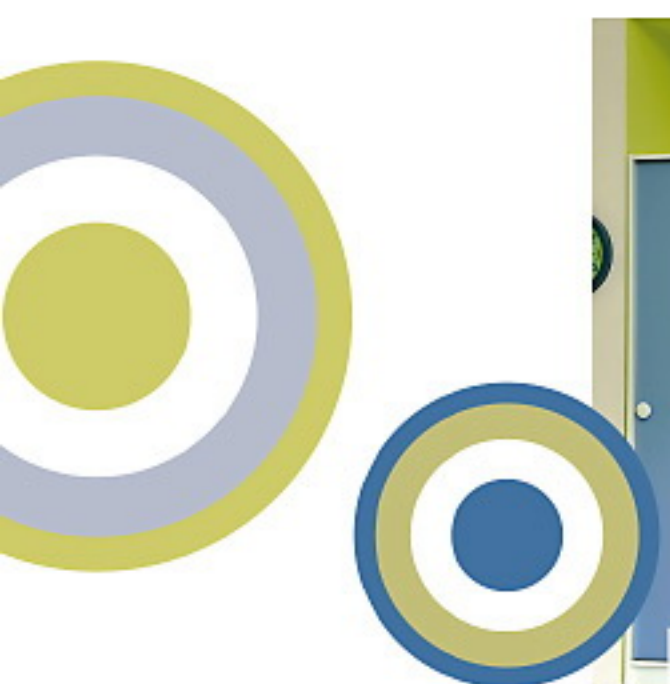

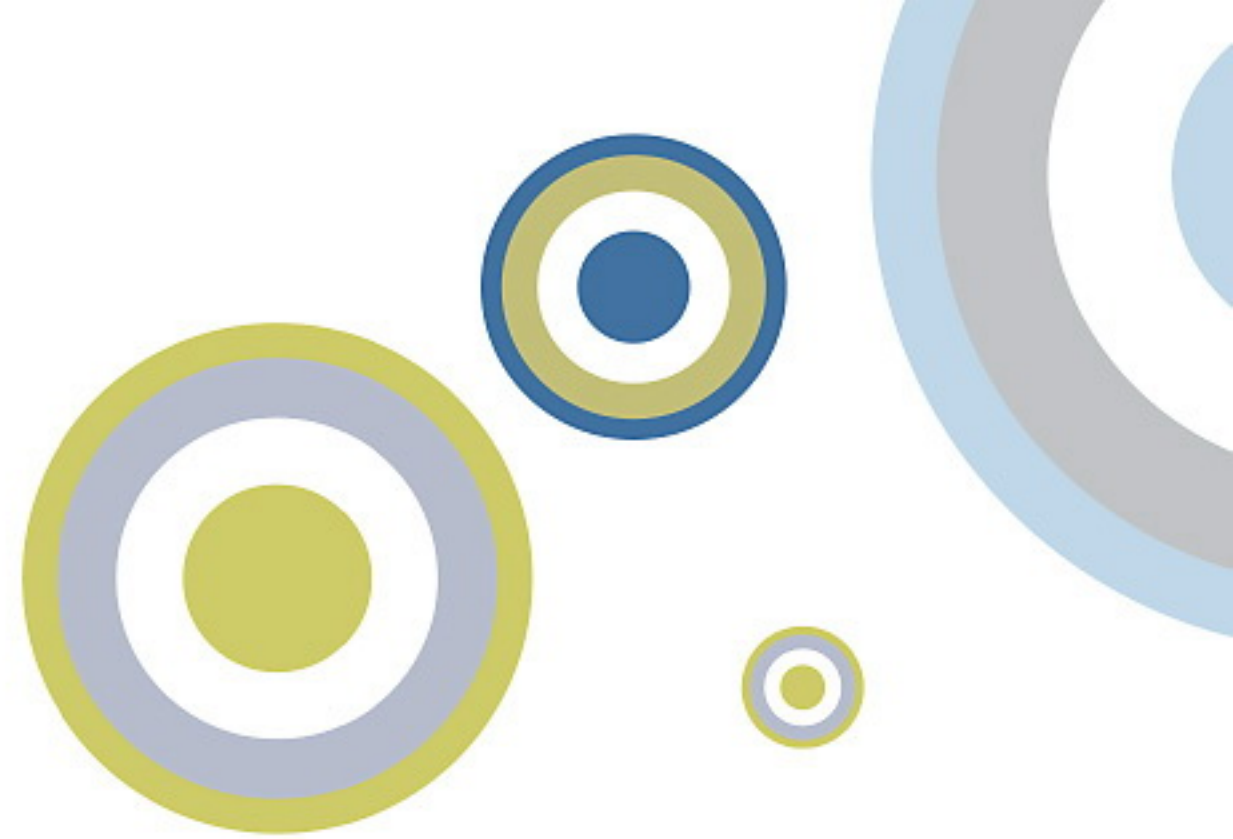

The youngest will feel good when they are surrounded by pink and blue colors of front surfaces of the elements, as these colors stimulate the feelings of warm and friendly environment to which they would feel they belong. A number of combinations is practically indefinite and corresponds very well to kids' imagination and needs during the period of childhood. Additional functionality is realized by adding the sliding doors what is especially suitable for small or aesthetically demanding spaces.
